THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. **PROSECUTION ON THE MERITS IS CLOSED.** THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN **THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE** OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. **THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. ## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER:** Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

### DETAILED ACTION

1. This Office action is regarding Applicant's response filed 21 March 2011 to a prior Office action. Claims 4-13, 17-19, 21, 22, 26-30, 33, 34 and 36-42 are pending. Claims 1-3, 14-16, 20, 23-25, 31, 32 and 35 are cancelled.
2. This Office Action is a **Second Action, Allowance** after an RCE.

### *Allowable Subject Matter*

3. **Claims 4-13, 17-19, 21, 22, 26-30, 33, 34 and 36-42 are allowed**, as amended in Applicant's Response filed 21 March 2011.
4. The following is an examiner's statement of reasons for allowance. The prior art of record does not disclose:  
  
Ashida et al. (US 2002/0091908 A1) teaches in the same field of the invention which is analytical data management. Ashida et al. teaches a computer implemented method for processing data for a spreadsheet system model, including the steps of:  
  
providing a spreadsheet model specification in a computer system, the spreadsheet model specification including a plurality of types of item, in respect of which entries may potentially be provided in a spreadsheet to which the spreadsheet system model relates [analytical database management with data, 0005], the types of item including: at least one first-type item for which input data is input into the computer system [customer data, 0005]; and  
  
at least one putative second-type item wherein second-type items are putatively determinable from operations performed on data stored in a first database [speculation data list, 0005], associated with at least one of said first or second-type items and

wherein second-type items are included in the database if ascertained to be determinable; searching, using a processor for the computer system, the input data for first-type item-type; storing said first-type item found by the searching step, in the first database [loads and generates multi-dimensional database, 0023], performing an iterative process, using the processor, to ascertain whether the first database includes one or more prerequisite items necessary to determine a putative second-type item [speculation model automatically generated by unit from customer data and speculation data, 0036], the iterative determining process comprising performing a plurality of iterations, but does not teach the combination and steps as recited in independent

**claim 38**, of:

- (a) each iteration comprises successively automatically reading a putative second-type item; associating that second-type item with an item determinant which specifies each prerequisite item for evaluation of that second-type item; for each second type item searching the first database for each prerequisite item for said second-type item; applying a Boolean operation which produces a true or false result depending on whether each prerequisite item is located in the first database; and storing in the first database the second-type item if the item determinant is true; and
- (b) the iterative determining process performs repeated iterations according to step (a) indefinitely until an iteration evaluates the determinants of all second-type items not stored in the first database in previous iterations as false, and automatically outputting, using the processor, an indication that the spreadsheet system model can be produced if items of the model specification are stored into the first database.

For **claim 39**, the reference teaches the limitations as stated above for claim 38's rejection, but does not teach:

- (a) each iteration comprises successively reading putative second-type items and ascertaining whether the first database includes prerequisite items sufficient to determine said putative second-type item, and if the first database does include prerequisite items sufficient to determine said second-type item, automatically storing that second-type item in the first database, such that said second-type item becomes available as a potential prerequisite item for other putative second-type items in subsequent iterations;
- (b) the iterative process is automatically terminated when an iteration fails to store a second-type item in the first database which was not stored there in a previous iteration, thus indicating that all putative second-type items logically determinable from said stored data have been determined and stored in the first database; and
- (c) re-assessing in each iteration putative second-type items that could not be determined in

previous iterations due to lack of a prerequisite item, by taking into account second-type items stored in the first database by previous iterations; and outputting an indication that the spreadsheet system model can be produced if items of the model specification are stored in the first database.

### ***Conclusion***
